

HitchHoist® Portable Truck Crane

750 lbs. one person. no problem!

Lifting transformers, cable reels and other heavy equipment is easy with the HitchHoist Portable Truck Crane from Alcoa Conductor Accessories. HitchHoist easily mounts on any pickup and can lift loads up to 750 lbs.* without special tools or modification to trucks. A single person can install the crane and lift heavy, unwieldy items safely and efficiently. HitchHoist has just five parts and assembles in two minutes. The crane's single heaviest section weighs just 40 lbs. When correctly installed and fastened, HitchHoist does not require removal for road travel.

HitchHoist. A safer way to lift.

features

Lifts 750 lbs.*

With a receiver hitch that has a tongue rating of 1000 lbs. or more, the HitchHoist allows one person to safely and efficiently lift 750 lbs. from the ground to the bed of a pickup. The HitchHoist eliminates worker back injuries, claims and lost work time.

Lightweight and Portable

The HitchHoist consists of 5 pieces. The heaviest piece is weighs less than forty pounds. The unit as a whole weighs 125 pounds. It can easily be moved from one truck to another. When traveling, the HitchHoist does not have to be removed.

Easy Installation

The HitchHoist fits in a 2-inch, square Class III or higher, V5 rated hitch receiver. No modifications need to be made to the truck. One person can install it in 2 minutes. No special tools are required for installation or operation. Each unit comes with an easy to follow installation video.

Load Leveling Device

The HitchHoist features a load-leveling device. This keeps the payload from swinging out of control while lifting. This eliminates damage to the vehicle while keeping the operator safe.

Load Travel Restricted to 110°

The load travel is restricted to 110°. This allows the payload to go from the middle of the truck bed to directly behind the truck. This keeps the operator and the payload out of traffic and harms way. The load does not reach the wheel well or rail.

Available in Safety Yellow

The HitchHoist is available in Black or Safety Yellow.

* To reach 750 lbs. lifting capacity, vehicle must be outfitted with a receiver hitch that has a tongue weight rating of 1000 lbs. or more.

HitchHoist® Portable Truck Crane

accessories

Drum/Barrel Lifting Sling

The Drum/Barrel Lifting Sling is made of high strength nylon. It is designed to safely and efficiently move a drum or barrel. The barrel sling is adjustable and will handle a range of sizes.

Transformer Sling

The transformer sling is made out of high-strength nylon. The transformer sling is specifically designed to hook to the lifting posts on a transformer.

Spreader Bar

The spreader bar is designed to distribute lifting stresses evenly and reduce lateral forces applied by slings. It allows for safe lifting of larger items. Each spreader bar is 33 inches long and comes with a 24 inch grade 80 steel chain and grab hook.
